EDUARDO PAZ ORDUÑA

Player-Coach Engineering Lead: Hands-on in CI/CD, Telemetry and Mobile SDKs

Madrid, Spain | Remote or hybrid, EU time zones | jobs.edupaz2@proton.me
linkedin.com/in/edupaz | github.com/edupaz2

SUMMARY

Player-coach engineering lead who has led teams of 7 to 10 while staying in the code (CMake, Conan, CI/CD, telemetry). I grow engineers into owners of whole systems: 5 promotions and 3 hires at TomTom, and a team that grew from 3 developers to 10 at Pix4D. I have shipped Android smartphones, drone-mapping apps and an automotive navigation SDK. About 9 years leading teams. Daily Claude Code user.

EXPERIENCE

TomTom, Engineering Manager I, Madrid

Aug 2024 to present

Othello: Telemetry and Shared Frameworks, Navigation SDK (Sep 2025 to present), 7 engineers

- Lead 7 engineers across several countries who own telemetry and shared frameworks (HTTP, logging, authentication, feature toggles, developer DemoApp) for the Navigation SDK.
- Delivered UserConsent-based degradation of LiveServices on the critical path for a major automotive OEM.
- Shipped Feature Toggle v2, AMS authentication for automotive, Remote Telemetry management and Sleep Mode for Telemetry in 2026.
- Migrated the developer DemoApp to Jetpack Compose and fixed iOS telemetry dependencies for Swift Package Manager.

ACME: Developer Experience, Infrastructure and CI/CD (Aug 2024 to Sep 2025), 8 engineers

- Drove the Conan 2 migration hands-on (Python, Kotlin, Swift), replacing the deprecated, unsupported Conan 1 so libraries and dependencies could be updated easily.
- Designed GitHub Actions and Azure workflows, improving release reliability across services and SDKs.
- Built AI-assisted on-call automation with Claude Code to read Grafana dashboards and speed up Slack alert handling.
- Reported SonarQube, Veracode and Coverity findings to directors and staff engineers.
- Across both teams: quarterly roadmaps at 90%+ scope completion; 5 promotions, 3 hires, 100% manager-enablement score.

Pix4D, Team Lead then Software Team Manager; Senior Software Engineer, Madrid

May 2019 to Jul 2024 (Senior Software Engineer May 2019 to Sep 2020)

- Led a cross-functional team of up to 10, grown from 3 developers, building PIX4Dscan, PIX4Dcapture Pro and PIX4Dcatch (C++17, Qt 5.15) for Android and iOS.
- Shipped PIX4Dcapture Pro in under 6 months against a hard deadline; it reached 16k drone pilots a month.
- Cut compile time by 73% hands-on, moving QMake to CMake and Conan 1 to Conan 2.
- Built fastlane-based CI/CD for iOS and Android (Concourse, Docker, Conan) behind weekly store releases.
- Hired 5 people and promoted 2 engineers to senior; ran an agile transformation (Scrum, Kanban, Shape-Up) with 100% team satisfaction.
- As Senior Engineer: ported Qt 5.12 to 5.15 and the build system to CMake.

bq, Shenzhen and Madrid

Mar 2012 to Jun 2016

- **Senior Software Manager** (Jan 2015 to Jun 2016): built the Shenzhen software team from scratch, hiring 4 engineers from OEM partners for in-house Android development and bug fixing.
- **Technical Project Manager** (May 2013 to Jan 2015): first bq employee in Shenzhen; reviewed hardware and software issues daily with Chinese manufacturers and QA in Spain; oversaw the first launches of Aquaris 4.5 and 5.
- Shipped three Aquaris families totalling about 3.7M devices and about $610M turnover, including the first Ubuntu phone and the first Cyanogen phone in Europe.
- Set up device testing and certification processes and the communication line with HQ in Madrid.
- Earlier (Mar 2012 to May 2013): Expert C++ developer on e-reader firmware (Cervantes family, Qt on Debian).

Malata Mobile, Software Engineer and Field Application Engineer, Shenzhen

Jul 2016 to Oct 2018

- Supported customers on site in Mexico, Portugal, France, Argentina, Turkey, the UK and the US, supervising Android smartphone production above 150K units a year.
- Passed operator and brand homologations: Telcel in Mexico, SFR and MEO in Lisbon, Kodak and COTO in Buenos Aires.
- Set up Redmine, JIRA, Jenkins and automated tests, speeding up issue reporting by 60%.

Freelance, Shenzhen

Oct 2018 to Mar 2019

- Supervised Android TV software and hardware development for TD Systems at Chinese ODMs, including Google MADA certification; managed OEM relationships for Aiwa Mexico.
- Co-developed SnipeLights, an Android and iOS companion app, for a friend's hardware product.

Earlier career (2004 to 2012): Vaxtor Systems, senior C++ programmer and product manager (UAV ground station for Boeing R&T Europe; VaxALPR). Pyro Studios, gameplay and tools programmer (Planet 51, Xbox 360 and PS3). Sistemas Alem, control software for robotized parking.

SKILLS

Leadership and people: 1:1s, hiring and interview design, onboarding, performance reviews, promotions, coaching; teams of 7 to 10 in distributed, multicultural settings

Build and release: CMake, QMake to CMake migration, Conan 1 and 2, GitHub Actions, Concourse, Jenkins, fastlane, Docker, App Store and Google Play publishing

Observability and telemetry: Telemetry frameworks for SDK usage, Grafana dashboards, on-call rotations, GDPR-aware telemetry, remote telemetry management

Languages and platforms: C++17, Qt 5.15/QML, Kotlin, Swift, Jetpack Compose, Swift Package Manager, Python, Bash; Android and iOS

AI-assisted engineering: Claude Code daily: tech-debt PRs, design documents, codebase research, on-call automation

Delivery practices: Quarterly roadmaps, Scrum, Kanban, Shape-Up, JIRA, Confluence, OKRs

EDUCATION AND CERTIFICATIONS

M.Eng Computer Engineering, Universidad Complutense de Madrid (1999 to 2005)

Master in Game Programming, Universidad Complutense de Madrid (2006 to 2007, award of excellence)

Claude Code in Action, Anthropic (May 2026); Agentic Coding with Claude Code, O'Reilly (Jul 2026)

LANGUAGES

Spanish (native); English (full professional); Chinese (HSK 2)

ADDITIONAL

Spanish national ice hockey team defenseman, 1997 to 2013 (10 senior World Championships, 2 Olympic qualifiers, best defenseman award twice). Level 2 certified ice hockey coach.
